SCANLAN®  
**VASCU-STATT®**  
 SINGLE-USE BULLDOG CLAMPS

INTERNATIONAL

Surgical products designed and manufactured by the Scanlan family since 1921

SCANLAN®  
**VASCU-STATT®**  
SINGLE-USE BULLDOG CLAMPS

Vascu-Stattd single-use bulldog clamps are a lightweight, cost-effective alternative to metal bulldog clamps.

- Angled and straight designs
- Variety of clamping pressures
- Color coded for easy identification
- Atraumatic jaws
- Apply by hand or with Scanlan Vascu-Stattd applicators
- Radiopaque
- Not made with natural rubber latex

Vascu-Stattd bulldog clamps feature a consistent pre-set tension unlike metal bulldog clamps where pressure can weaken after repeated use.

## Vascu-Stattd System

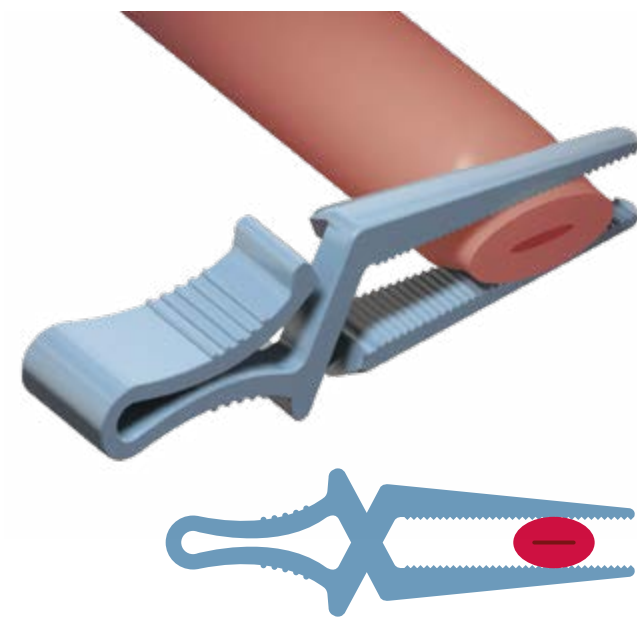

**Vascu-Stattd**  
Original bulldog clamp design

**Vascu-Stattd II**  
With firmer clamping pressure

**Vascu-Stattd Plus**  
Vascu-Stattd PLUS single-use bulldog clamps offer the same benefits as the Vascu-Stattd original clamps, but feature a cushioned Gentle Jaw™ surface.

**Vascu-Stattd Micro**  
Micro Vascu-Stattd clamps offer even smaller clamp sizes – may be used in peripheral micro vascular, neuro surgery, plastic and hand surgery.

Micro Vascu-Stattd single-use bulldog clamps also feature a radiopaque tag line for safe and easy visualization within the operating field.

*Parallel clamp designed for maximum occlusion and atraumatic pressure*
